

Holes and Openings Inspection Form

Company Name: _____

Jobsite: _____

Person Inspecting: _____ Date: _____

- Holes are guarded by a cover, guardrail, or equivalent on all sides (except at entrances to stairways or ladders).
- Toeboards are installed around the edges of a permanent hole, where persons may pass below the opening.
- Hole covers constructed and secured to withstand twice the maximum intended load.
- The glass in windows, doors, and walls that could be subject to human impact is appropriate for its use.
- Grates or similar covers are designed so that the spacing will not catch foot traffic or rolling equipment.
- If necessary, unused service pits and portions of such pits are covered by guardrails, or the equivalent.
