Compensable fatalities are claims, accepted by insurers, arising from a fatal occupational injury or disease that entitles workers and/or their survivors to compensation. Data exclude deaths of workers not subject to Oregon workers' compensation coverage, such as workers who were self-employed, worked in Oregon for out-of-state employers, city of Portland police and fire employees, or federal employees. For additional information about employer coverage requirements, you may contact the Employer Compliance Program at wcd.employerinfo@state.or.us or call 888-877-5670.

+ Indicates Oregon OSHA investigated the fatality. Investigated fatalities are a subset of compensable fatalities that Oregon OSHA researches to determine whether they could have been prevented by compliance with safety and health standards and/or implementing a safety and health management program. Please contact Oregon OSHA at 503-378-3272 for more information on these investigations.

Injury age is the age of the employee at the time of the fatal injury or the diagnosis of the fatal illness. It may be different than the age at death.

Data are based on the date the Department of Consumer and Business Services received notification that the fatality claim was accepted, which may be different than the date of injury or the date of death.

Industries are grouped and classified according to the North American Industry Classification System (NAICS), 2002 edition.

Employees of client leasing firms are reported by the industry in which they were working at the time of injury or illness.

Events are classified according to the Bureau of Labor Statistics' Occupational Injury and Illness Classification System (OIICS).

Tenure is the length of time, in months, that the employee had been working for the employer at the time of the fatal injury or diagnosis of fatal illness. It is not necessarily indicative of the worker's level of experience.

* Indicates the tenure is unknown. < 1 indicates the tenure is less than one month.

Source data are continually updated to be as accurate as possible, so report results may vary over time.
