Compensable fatalities are claims accepted by insurers arising from a fatal occupational injury or disease that entitle workers and/or their survivors to compensation. Data exclude deaths of noncovered workers such as workers who were self-employed, worked in Oregon for out-of-state employers, city of Portland police and fire employees, or federal employees. For additional information about employer coverage requirements, contact the Employer Compliance Program at wcd.employerinfo@state.or.us or call 888-877-5670.

Tenure is the length of time the employee had been working for the employer at time of injury or exposure. Reference years are based on the date the Department of Consumer and Business Services received notification that the fatal claim was accepted, which may be different than the date of injury or illness.

- Dashes indicate no claims were received.

Source data are continually updated to be as accurate as possible, so report results may vary over time.
