Table 1. Average temporary disability days and claim costs paid for resolved accepted disabling claims by resolution year, Oregon, 1996-2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Table 2. Average temporary disability days and claim costs paid for resolved accepted disabling claims by resolution year and insurer type, Oregon, 1996-2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Table 3. Average temporary disability days and claim costs paid for resolved accepted disabling claims by accident event or exposure, Oregon, 2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Claim characteristics are classified according to the Bureau of Labor Statistics' Occupational Injury and Illness Classification System (OIICS).

Table 4. Average temporary disability days and claim costs paid for resolved accepted disabling claims by nature of injury or disease, Oregon, 2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Claim characteristics are classified according to the Bureau of Labor Statistics' Occupational Injury and Illness Classification System (OIICS).

Footnotes on following page

Table 5. Average temporary disability days and claim costs paid for resolved accepted disabling claims by body part affected, Oregon, 2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Claim characteristics are classified according to the Bureau of Labor Statistics' Occupational Injury and Illness Classification System (OIICS).

Table 6a. Average temporary disability days and claim costs paid for resolved accepted disabling claims by industry (NAICS), Oregon, 2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Industry is classified according to the North American Industrial Classification System (NAICS), 2002 edition. Employees of client leasing companies are reported by the industry in which they were working at the time of injury.

Footnotes on following page

Table 6b. Average temporary disability days and claim costs paid for resolved accepted disabling claims by industry (NAICS), Oregon, 2011

Footnotes:

Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death. Claims are reported by the year of claim resolution, which is the year of the latest notice of claim closure, determination order, or claim disposition agreement for initial claim openings. This may be different than the year of injury or year of claim acceptance. Death benefit and permanent total disability (PTD) claims, as well as their indemnity costs, are excluded from this analysis. Worker, employer, and insurer reimbursements from the Workers' Benefit Fund are also generally excluded.

Claim cost is the composite of medical and indemnity costs. Indemnity costs include temporary disability (TD), permanent partial disability (PPD), claim disposition agreement (CDA), disputed claim settlement (DCS), and vocational assistance. Indemnity costs incurred after claim closure that were paid through mid-April 2012 are also included in this table. This primarily includes PPD modified by dispute resolution, CDA, DCS, and vocational assistance costs.

Cost statistics are means, unless otherwise specified. Aside from temporary disability days, costs have been rounded, and components may not sum to composite averages. Some medical and indemnity costs are estimated. Most often estimates are for temporary disability days, medical, and vocational assistance for initial claims resolved by CDA, about which the department doesn't require regular cost reports. Conclusions should not be drawn for rows with a small number of claims.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue, then the temporary disability days and costs for the most recent year will decline as claims are reopened and then closed in future years.

Industry is classified according to the North American Industrial Classification System (NAICS), 2002 edition. Employees of client leasing companies are reported by the industry in which they were working at the time of injury.
