Accepted disabling claims are claims, accepted by insurers, arising from occupational injuries or diseases that entitle workers to compensation for disability or death.

Claims are reported by the year of claim resolution, which is the year of latest claim closure or claim disposition agreement. Fatality and permanent total disability claims and their associated costs are excluded.

Industry is classified according to the North American Industrial Classification System (NAICS), 2002 edition.

Employees of client leasing firms are reported by the industry in which they were working at the time of injury.

Claim cost figures have been rounded, thus component averages may not sum to composite averages. In addition, due to the estimation process, conclusions should not be drawn for rows with a small number of claims.

Average costs for the indemnity components are computed over all accepted disabling claims. The time loss days and dollars include estimates of time loss for claims with claim disposition agreements prior to claim closure. Insurers do not report this data to the department. Worker or employer reimbursements from the Workers' Benefit Fund are not included.

Indemnity costs incurred after claim closure that were paid through mid-May 2008 are included in this table. This primarily includes permanent partial disability and disputed claim settlements awarded at reconsideration or at hearings and vocational assistance costs. These costs after closure will increase over time.

Medical costs are reported at the time of claim closure for approximately 88 percent of claims. The average medical costs of claims without data (12 percent of claims) are assumed to be the same as those with reported data. Medical costs after claim resolution, which are often substantial, are not included in this report.

PPD = Permanent partial disability; CDA = Claim disposition agreement; DCS = Disputed claim settlement.

Data in this table will change. The claim counts will change as claims are reopened and resolved. Also, as mentioned above, post-closure costs will increase over time. However, if past trends continue it is anticipated that the average time loss costs and time loss days for the most recent year will decline as claims are reopened and then closed in future years.
