¹Compensable fatalities are claims, accepted by insurers, arising from a fatal occupational injury or disease that entitles workers and/or their survivors to compensation.

² North American Industry Classification System

³ Year to date total includes first quarter only.

Note: Dashes indicate no claims were received.

Data exclude deaths of workers not subject to Oregon Workers' Compensation coverage, such as workers who were self-employed, worked in Oregon for out-of-state employers, city of Portland police and fire employees, or federal employees.

Quarterly counts are preliminary and subject to change as source data for fatalities are received throughout the year.

Data are based on the date the Department of Consumer and Business Services received notification that the fatality claim was accepted, which may be different than the date of injury or the date of death.
