

## **Audio guided: (more)**

An audio-guided module is a combination of visual and audio information.

Oregon OSHA PESO audio-guided modules have audio and text in English and Spanish. The main purpose of the audio-guided modules is to teach basic concepts of occupational safety and health to people with different reading levels.

### **Student Interaction:**

Students advance through the course with a computer mouse by clicking Play, Stop, Next, and Previous.

### **Student Learning:**

Students look at graphics while listening to a recording. Students can read along with the words if they can read at the fourth/fifth grade level. If they wish, they can listen to both languages.
