Footnotes:

Compensable fatalities are claims, accepted by insurers, arising from a fatal occupational injury or disease that entitles workers and/or their survivors to compensation. Data exclude deaths of workers not subject to Oregon Workers' Compensation coverage, such as workers who were self-employed, worked in Oregon for out-of-state employers, city of Portland police and fire employees, or federal employees. For additional information about employer coverage requirements, you may contact the Employer Compliance Program at wcd.employerinfo@state.or.us or call (888) 877-5670.

Program-related fatalities are a subset of compensable fatalities that resulted from incidents the DCBS Occupational Safety and Health Division (Oregon OSHA) determined may have been prevented by complying with safety and health standards and/or implementing a safety and health management program. Please contact Oregon OSHA at (503) 378-3272 for information about Oregon OSHA fatality investigations.

Tenure is the length of time that an employee had been working for the employer at the time of the fatal injury or the diagnosis of the fatal illness.

Dashes indicate no claims were received.

0.0 percent indicates that the percentage of claims calculates to less than 0.05.
