Footnotes:

Compensable fatalities are claims, accepted by insurers, arising from a fatal occupational injury or disease that entitles workers and/or their survivors to compensation. Data exclude deaths of workers not subject to Oregon Workers' Compensation coverage, such as workers who were self-employed, worked in Oregon for out-of-state employers, city of Portland police and fire employees, or federal employees. For additional information about employer coverage requirements, you may contact the Employer Compliance Program at wcd.employerinfo@state.or.us or call (888) 877-5670.

Industries are classified according to the [North American Industry Classification System](#) (NAICS), 2002 edition.

Employees of client leasing firms are reported by the industry in which they were working at the time of injury.

During 2004, the Oregon Workers' Compensation Division began converting claims data from the Standard Industrial Classification (SIC) system to the new North American Industry Classification System (NAICS). This conversion will allow the United States to make data comparisons with Canada and Mexico. Tables for 2004, 2005, and 2006 are available for fatalities by SIC and NAICS codes. Previous years' tables were presented using SIC codes only.

Dashes indicate no claims were received.

0.0 percent indicates that the percentage of claims calculates to less than 0.05.

Source data are continually updated to be as accurate as possible, so report results may vary over time.
